Experience

App Developer intern

1 MONTH

In STAXTECH

15 June - 15 July

During my App Developer Internship at Staxtech, I worked on understanding mobile app development concepts and improving my practical skills in UI design and feature implementation. Along with this, I completed three mini projects—a To-Do List, an AI Chatbot, and a Quiz Game—developed using HTML, CSS, and JavaScript. These projects strengthened my foundational skills in front-end development, enhanced my problem-solving abilities, and helped me gain confidence in building functional, user-interactive applications.

AI and ML Intern

6 Days

In STAXTECH

2 Dec to 7 Dec

During my AI/ML Internship at Staxtech, I learned basic machine learning concepts and improved my coding skills. I also built a Password Generator in Python that creates strong passwords based on user-defined rules such as number of characters, number of special characters, and number of integers.

Education

FATIMA GIRLS HR SEC SCHOOL

2021 - 2023

- Senior Secondary education
- 72 %

R P SARATHY INSTITUTE OF TECHNOLOGY

2023 - 2027

- B.Tech (AI&DS)
- CGPA: 7.9 / 10

Project

Password Generator (Basic Level)

Created a strong password generator where users can choose the length, number of special characters, and number of digits for better security.

Green Basket – Smart Agriculture and Marketplace Platform

Developed Green Basket, a platform connecting farmers and consumers with product listing, purchasing, and agricultural job vacancy features, improving market accessibility, employment opportunities, and farmers' income through digital solutions

CERTIFICATION

- Python For Data Science (67 hours) Saylor academy Building
- With Artificial Intelligence (45 hours) Saylor academy Data
- Science Essential (30 hours) cisro networking academy Python
- Essential I (30 hours) cisro networking academy

Achievements

🏆 3rd Place – Project Demo, NOVITAS 2K26 National Level Technical Symposium, Dhirajlal Gandhi College of Technology, Salem (Feb 2026).

About Me

Motivated B.Tech AI& DS student with beginner-level experience in Java, Python and SQL. Interested in improving technical skills through real-world projects and continuous learning. Eager to explore opportunities in web development, AI/ML, and software development. A quick learner with a positive attitude and strong interest in building practical solutions

Skills (Languages)

... Java ... SQL

... Python

Soft Skills

... Teamwork ... Fast Learner
... Adaptability ... Leadership

Skills (Tools & Platforms)

... MS Word ... Excel
... MS PowerPoint ... Canva

languages

- English
- Sowrashtara
- Tamil

CONTRIBUTE

- Attended workshops on Ethical Hacking, Cybersecurity, and Artificial Intelligence..
- Participated in Capture the Flag, Code Debugging, and Technical Quizzes competitions.
- Presented in Smart India Hackathon.
